Over 700 high-quality wooden  
products by Palmako

# Dear Customer,

Our lives, society and the world itself is changing daily. We are just a small part of it but need to fit in with all the everyday actions, communication and struggles to cope with the changes. We go to work, communicate with a lot of people, find solutions and cooperate, go to different events or play with kids, but at the end of the day just want to sit back and be in a moment where nothing can disturb or influence us. We have to remind ourselves that we need moments to ourselves. One wonderful place to be with yourself or close ones is a garden.

Our garden is there for us and we are ready to take care of it. We appreciate the presence of our garden and are inspired from each other. Our gardens let us escape from the routine and find the balance between everyday interaction and self-calm. Being in our garden makes us feel good, it is a special place in our life and we feel great being part of it.

You can turn your garden into everything you could imagine. While being in the middle of it, look around you for a second, what could be refreshed or redone so that you would be happy. No matter if the changes are small and barely noticeable or huge and maybe even life changing. We are here to support you. If you want to have a nice and spacious extra room in the garden, we have a lot of different garden houses to choose from, starting from classical log houses until modern cabins with sliding doors. A shed for storing things, a playhouse and playground for kids, a sauna to enjoy spa treatments, a garage or a carport to protect your car from the weather – we have all these products in our range. Add some fence panels for more privacy, a nice garden table where to have memorable dinners with your family and friends, some flowerboxes for growing the green or favourite flowers and your outdoor living quality rises to a new level. What could be more enjoyable than sharing this with your loved ones.

Perhaps you have noticed that the catalogue in your hand is quite heavy. Our product range is very wide, this is why we have organized our products by categories on the side of the catalogue so you can easily find what you are looking for. Our products are made of the finest Nordic spruce, which is known worldwide for its excellent properties. As wood is a renewable material binding into it a remarkable quantity of CO<sub>2</sub> while growing, then by purchasing our products you are helping to support sustainable environmental-friendly attitudes and do at least a little good to our planet.

Wood is a natural material and to enjoy our products in the garden for a long time you will need to protect the wooden product against weather effects, wood-destroying fungi and insects. Therefore, we truly recommend using our product treatment service. Depending on the product type we are able to dip, pressure-treat or paint our products (initially in white or grey colours). Please read more about treatment possibilities on pages 342-344.

We continually appreciate your feedback regarding our products and services and we are eager to know how you have used them. You are welcome to share your ideas, proposals and photos via social media with [#palmako](#) [#bringjoytothegarden](#) or share them privately with us by sending an e-mail to [palmako@palmako.ee](mailto:palmako@palmako.ee) or via our homepage [www.palmako.ee](http://www.palmako.ee).

We wish all our customers a joyful and active 2024!

Marketing Manager

# The joy of being in the garden

## The garden – our connection with nature

We live our lives at crazy speeds amid droves of people and every day we become increasingly more alienated from nature. Going outdoors takes time and money and is an all around taxing experience. However, our ancient selves don't want to stop smelling the grass in the morning or seeing the light of the setting sun through tree branches. When we go back to the past along this line of heritage, we quickly reach our predecessors, who were peasants,

cattle breeders or hunters. Urbanisation is a new phenomenon in human history. A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment. This feeling is deeply rooted in our subconscious and it makes the existence of a garden and time spent there so important for us.

## The joy of being in the garden

We all strive to achieve ever-greater quality of life. Constantly juggling mountains of work and the need to spend time with our family forces us to look for balance between home and office, between reaping and sowing. It motivates us to emphasise our presence.

Our restless spirit and modern life force us out of our comfort zone – searching for greater value in life through social interaction and self-realisation.

Palmako doesn't build an artificial world with fake emotion and fake people. In the shape of the garden, Palmako extends quality living space, making it a special place in people's lives. Somewhere they live their real lives. A life which has meaning. Which is filled with quality time spent together, which we share with those closest to us. Somewhere we experience special moments.

We don't just make garden houses. We don't restrict ourselves to comprehensive garden solutions either.

We bring joy to the garden.

**A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment.**

## The many dimensions to garden life

The special moments in our lives are different and the roles gardens play in our lives are also different. A garden can be a place of relaxation where you hide from the world. Or it can be a meeting place where you discuss life with your loved ones. A garden can be the place where you devote yourself to your hobbies.

**Every material has its character and soul. Wood is warm and beautiful and we understand its life cycle.**

A beautiful garden can be our best feature for impressing neighbours and passers-by. It can also be a practical place for growing organic fruit and vegetables for our own use. We believe that quality time has many angles and colours, like an eventful life. We do not make decisions for garden owners; we simply do our best to turn their gardens into special places where moments are inspiring and different, just like people. The more varied our garden is the more joy it brings us.

## Timeless garden wood

We have used wood to build our houses and gardens since ancient times and it has accompanied us throughout the centuries of our development. Every piece of wood has its own character and soul. Wood is warm and beautiful and we understand its life cycle. Like us, trees move in a circle of life, growing and living in the

time given to them. The constantly repeating cycle makes wood a renewable resource and using resources responsibly is increasingly more important in the context of growing environmental problems. Wood produced through correct and fair management is undoubtedly one of the best choices of our time. Wood is timeless – ancient and familiar on the one hand, and a building material with a clear future on the other.

# New this year

Life is changing constantly, our minds are open to new ideas every day. Like us our gardens need refreshing to grow and progress into a space we like and wish to spend qualitytime in. Our product development team has been working hard during the last years and has some new and exciting products to share with you.

To find new products quickly, just follow the sign „NEW!“ in brown squares next to the product and yellow circles in the index and check the product overview pages in front of every product category.

Now, be ready for the most exciting breaking news – Palmako has started to produce sliding doors and in 2024 there will be the launch of many new products with sliding doors with two different glazing options. Sliding doors “Slide” have 4 mm toughened single glass and sliding doors “Slide Plus” 4-16-4 mm toughened double glass. The dark grey colour of the sliding doors frame RAL7016 suits well with any treatment. Please read more about the sliding doors on pages 340-341.

The first new cabins with sliding doors are in the Gable roof cabins range – **Ines 11,1 m<sup>2</sup> Slide** and **Ines 13,7 m<sup>2</sup> Slide**. Both cabins are available also with double glazing.

The Flat roof cabins category surprises you with even more cabin models with sliding doors. Have a look at the **Lea 14,2 m<sup>2</sup> Slide** and **Lea 19,4 m<sup>2</sup> Slide**, both available also with double glazing. Welcome a new flat roof house family called Andrea! These modern cabins have sliding doors even in two walls, the large glass surfaces let more light into the house and allow a great view from inside out. We have Andrea houses with and without canopy roof – **Andrea 11,2 m<sup>2</sup> Slide**, **Andrea 17,1 m<sup>2</sup> Slide**, **Andrea 11,2+7,9 m<sup>2</sup> Slide** and **Andrea 17,1+7,9 m<sup>2</sup> Slide** – all available with single and double glazing.

The Flat roof cabins section has got a new brown pressure-treated cabin family **Alice**. These cabins with internal area of **4,7 m<sup>2</sup>**, **6,1 m<sup>2</sup>**, **9,0 m<sup>2</sup>** and **11,0 m<sup>2</sup>** differ with Valentine houses only in the roof. The same floors fit to Valentine and Alice cabins.

Our Modern Look glue laminated wall panels cabins range the Grace family has been widened by three more Grace models, of course with double glazed sliding doors – **Grace 11,2 m<sup>2</sup> Slide Plus**, **Grace 11,2+8,2 m<sup>2</sup> Slide Plus** and **Grace 14,1 m<sup>2</sup> Slide Plus**.

In the Garden Spa category we have complemented Anita barrel saunas with two more **Anitas** with internal area of **0,9 m<sup>2</sup>** and **1,6+0,7 m<sup>2</sup>**. And from now on we have two models with a full glass wall in front – **Anita 1,3+0,7 m<sup>2</sup> glass wall** and **Anita 1,6+0,7 m<sup>2</sup> glass wall**.

If you prefer to have a sauna made of logs, warmly greet our **Sanna sauna family**. Sanna models have three different bases in visual appearance. **Sanna 4,1 m<sup>2</sup>** and **Sanna 6,8 m<sup>2</sup>** represent our smaller versions. If you need a large canopy roof on the side, look at the **Sanna 4,1+5,9 m<sup>2</sup>** and **Sanna 6,8+5,9 m<sup>2</sup>**. If you like to spend time with your family or friends in a large front room with bright glass surfaces, welcome the sauna model with sliding doors – **Sanna 12,8 m<sup>2</sup> Slide**, also available with double glazing.

Palmako Connect product series has made a total makeover and has now items and sets with gable roof as well as with pent roof. Gable roof Bianca and pent roof Lenna sets are both available with the internal area of **8,3 m<sup>2</sup>**, **16,6 m<sup>2</sup>**, **24,9 m<sup>2</sup>** and **33,2 m<sup>2</sup>**. If adding the different components into the sets one can easily enlarge the internal area as much as needed. A wide range of different sets with and without sliding doors are waiting to be discovered. All Palmako Connect products are available in natural wood as well as in three dip treatments.

The Leif family in the Sheds section has widened by two sheds with a canopy roof on the side – **Leif 3,0+2,9 m<sup>2</sup>** and **Leif 4,5+2,9 m<sup>2</sup>**, which offers more functions if storing garden tools, bikes or other stuff.

Looking at the fence category, a louvre panel called **Laureen** has now got a new grey paint treatment.

And just as importantly, among the Furniture category we have launched a new brown-pressure treated garden furniture set **Aron**, which has a square table and four stools.

Heat pump cover **Edwin** in Deco category is available now in grey painted treatment.

We truly hope you now have a better overview of all our news and innovations and we have given you inspiration to start renewing your outdoor living area.

# Palmako is a part of the Lemeks Group

Lemeks AS was founded in 1993 with an aim of creating a modern forest stocking company systematically covering the whole country and on the basis of which a timber industry could be established that values local timber.

Today the Lemeks Group has developed into the biggest forestry company in Estonia that is funded by Estonian capital and operates successfully in the sphere of timber processing and forest stocking as well as in agriculture.

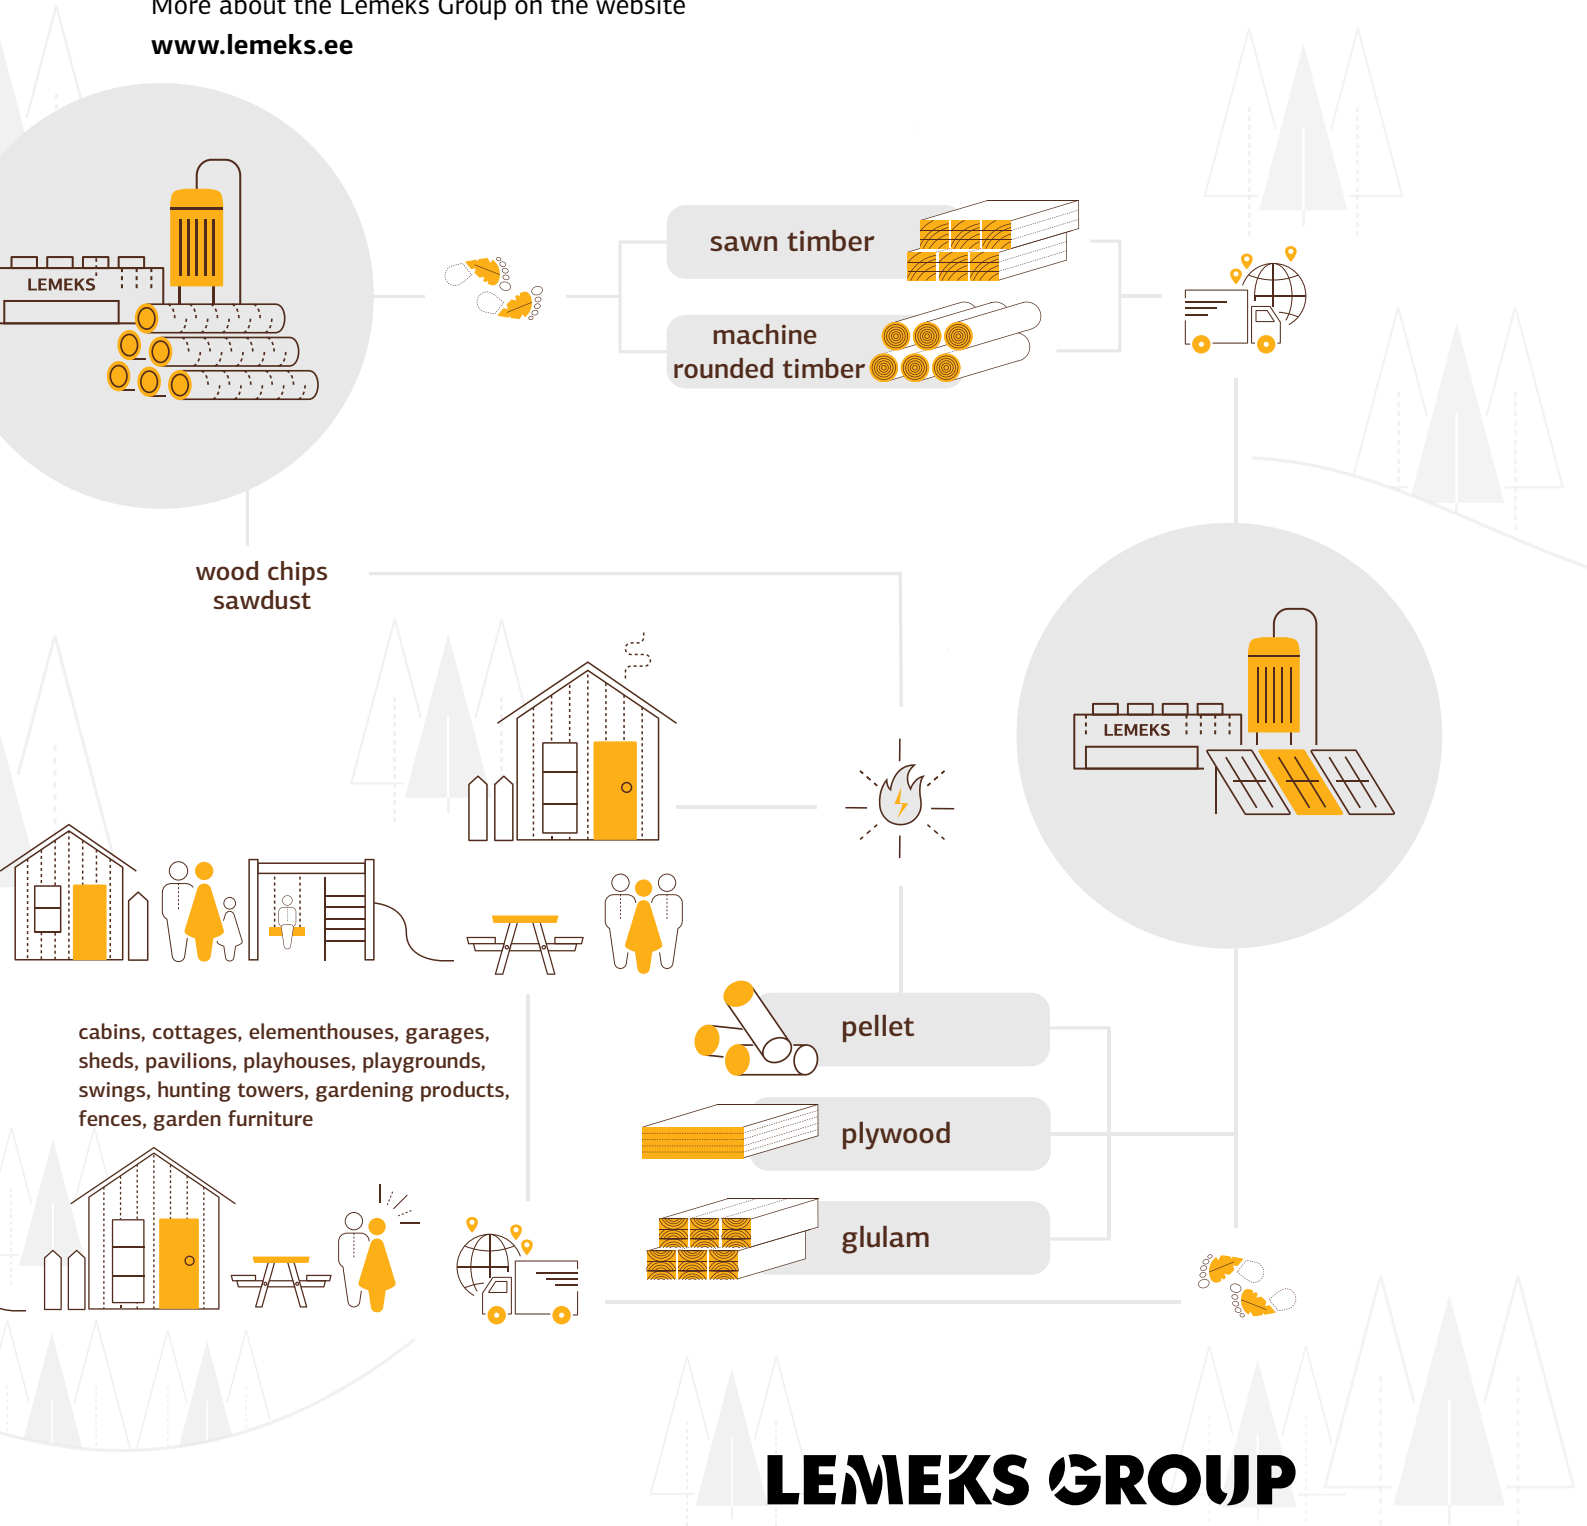

## Timber value-added chain

35 subsidiaries and related companies provide employment to more than 1000 people in Estonia, Latvia, Germany, Sweden, Norway, France, Spain, United Kingdom and the United States of America. Belonging to the Lemeks Group provides Palmako support in financial management and IT. It also gives an excellent opportunity to share valuable information and experience with other specialists in the same field. The existence of belonging to the group's value chain ensures the supply of raw material even during harder times.

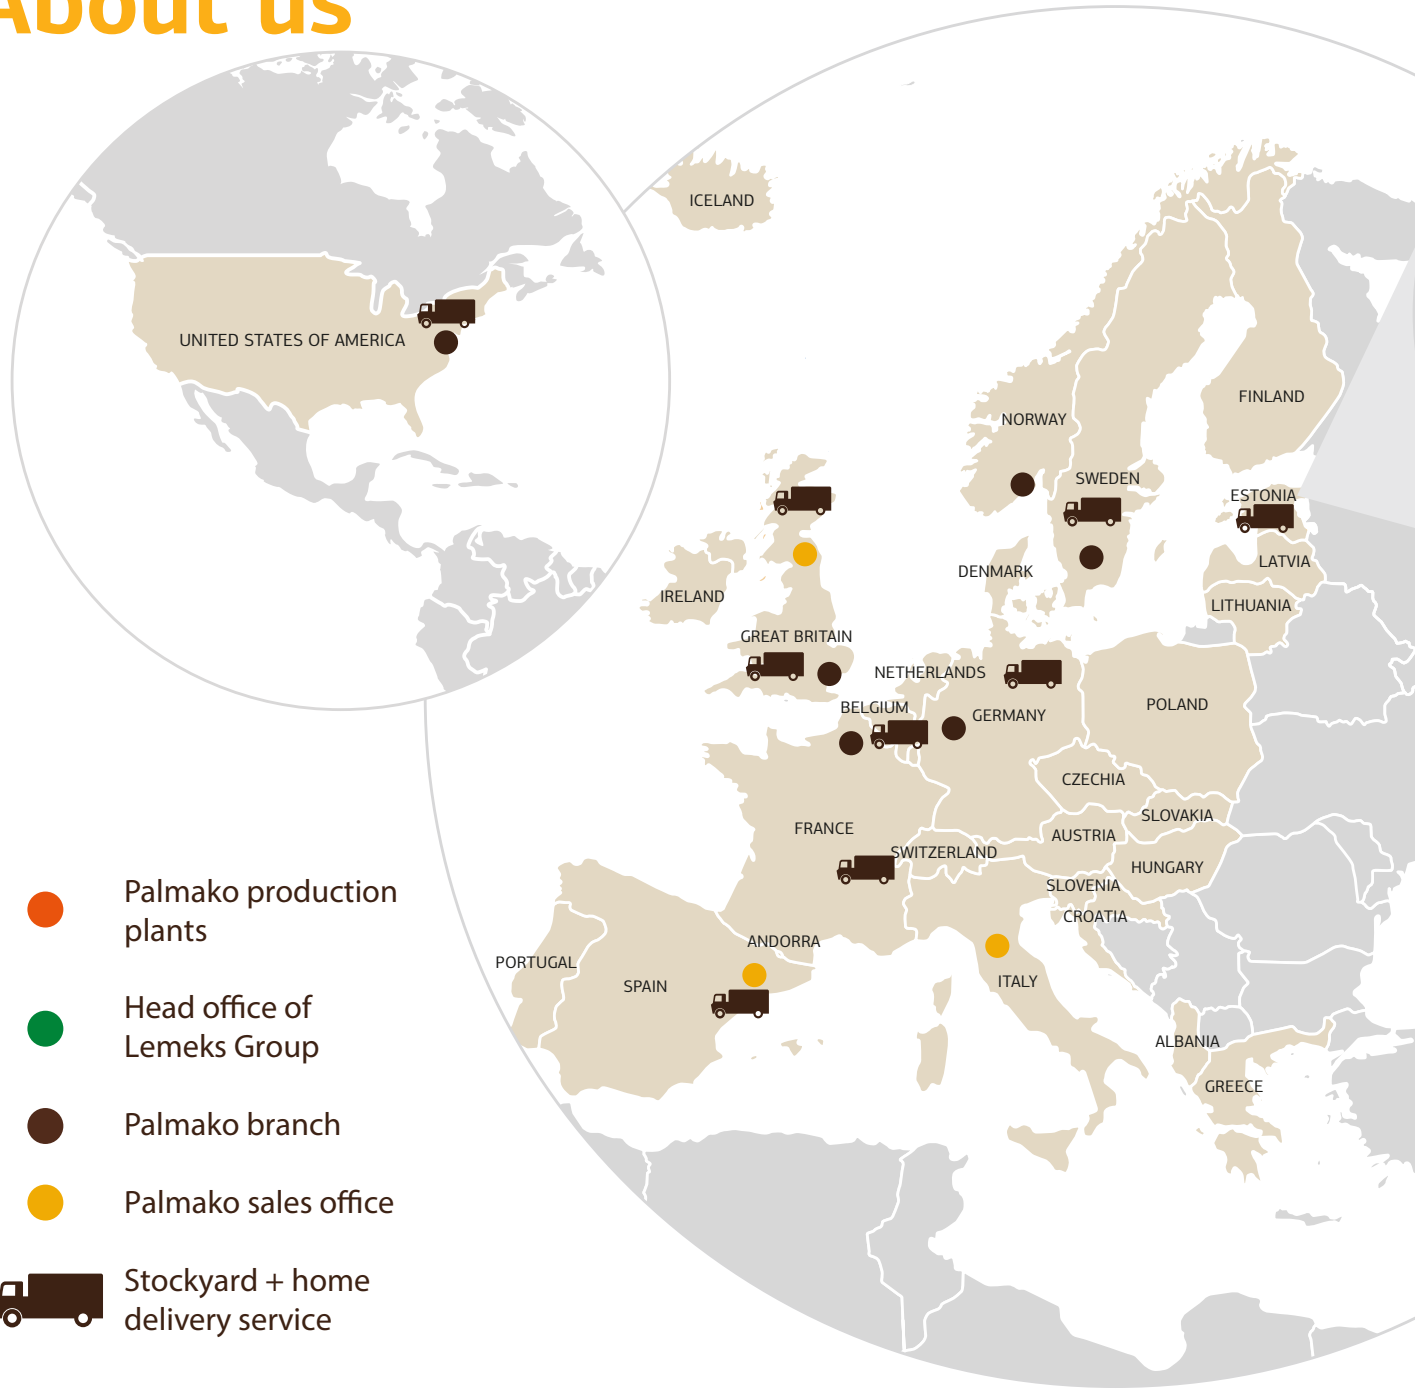

More about the Lemeks Group on the website

[www.lemeks.ee](http://www.lemeks.ee)

**LEMEKS GROUP**

# About us

- Palmako production plants
- Head office of Lemeks Group
- Palmako branch
- Palmako sales office
- Stockyard + home delivery service

## Principles that we follow in our everyday work:

- We are honest
- We are goal-oriented
- We are open to changes
- We are willing to take responsibility
- We respect our partners
- We assess our colleagues by their results, not by their words
- We share our knowledge and skills with each other
- We aim to do, rather than impress

We have invested over 50 million euros in modern, professional technology, which has enabled us to use the best machinery to make our products.

## Leading manufacturer in Europe

Palmako produces and exports over 60,000 wooden houses per year, and 26 years of active operation have given us significant experience to become Northern Europe's leading manufacturer and distributor of square log garden houses.

Scan this QR-code to see a video how our products are made with utmost care!

## Social responsibility

Although wood is a sustainable and regenerative natural resource, forestry requires careful and responsible management. An uncaring and irresponsible attitude towards forestry management will inevitably harm our environment significantly. We all have heard stories about the loss of some rainforests, but this concern applies equally to our Nordic forests as well. Palmako is FSC® certified, ensuring that we use wood from responsibly managed forests. We care about the environment, which we share and in which we all live. We really do.

## 5-year warranty

Over the last 26 years we have produced over half a million wooden houses. We use only the latest technology to make no compromises on quality, and to make sure that the nature and its resources are handled in the best possible way. We really care about the environment that we all share. We hope that already offers a reason to trust us, but we also place a 5-year warranty on our buildings if processing them with wood preservatives and paint as recommended. Playgrounds and swings have 2-year warranty for your complete peace of mind.

## Excellent customer service

We keep stock of our re-sellers to ensure fast, precise deliveries throughout Europe, and we are ready to deliver our products directly to the end customer's if required. As a multilingual company, we can service our customers in 8 different languages – English, German, French, Spanish, Finnish, Swedish and Norwegian as well as Estonian.

## Nordic spruce

Wood is an impressive, warm and living material. And nothing compares to the wonderful aroma of fresh timber. During the long, cold winters the trees grow slowly, which makes their timber especially thick and durable. You can feel it in all our products - comfortable garden and log houses, pavilions, carports, tool sheds, children's play houses, weekend and living houses, glue-laminated products, and wood pellets.

In addition to log cabins, Palmako manufactures wide selection of garden products, glulam products and heating pellets.

Estonia is regarded as the biggest wooden house exporter in the Europe. Palmako plays a significant part in this. Our products are found in more than 30 countries around the world.

Look for FSC® certified products.

# 2024 Catalogue User Guide

## Parts of the catalogue

**Introductory pages**, where you can find information about us, **p. 1-11**

**Products**, divided into classes according to their **function**, **p. 18-323**

**Information about how to navigate products' pages**, **p. 12-17**

**Optional products**, list of all those that Palmako offers, **p. 324-345**

## Special pages:

**p. 16-17** doors and windows introduction

**p. 118** quote request for cottages

**p. 122** Modern Look houses introduction

**p. 134-135** Nordic houses introduction and information on assembly

**p. 141** Nordic+ houses introduction

**p. 170-171** barrel and oval saunas introduction

**p. 179** log saunas introduction

**p. 185-186** sauna heaters introduction

**p. 190-191** Palmako Connect introduction

**p. 250** Nordic+ garages introduction

**p. 288-289** fence series introduction

**p. 301** assembling fence element and terrace fence

## Structure of products' pages

### FUNCTION

All our products are organised into separate classes according to their function and each class begins with an overview of all the items that it includes.

Cabins:  
outbuilding and leisure

Pavilions:  
Outdoor leisure

Fences:  
Fence panels

### TYOLOGY

Products of the same type and purpose carry the same name.

In each class products have been assembled into smaller families according to their design.

Families are made up of products that carry similar external characteristics, like type of roof, door and window type and placement, terrace and overhang of the front roof.

Gable roof

Flat roof

Pent roof

Helena cabin family

Irene cabin family

Lotta cabin family

### SIZE

Under each family the products are presented in the order of ascending surface area with increasing wall thickness and in some cases improvement of the quality of doors and windows.

15,1 m<sup>2</sup>  
Palmako cabin  
Helena

18,6 m<sup>2</sup>  
Palmako cabin  
Helena

24,6 m<sup>2</sup>  
Palmako cabin  
Helena

# How to read product information

## Name of the product

We have put a lot of thought into naming our products and as a result, the name of the chosen product reflects its function, family and size (also additional area when a terrace or side roof is included).

BRAND - **Palmako** > FUNCTION - **cabin** > FAMILY - **Lisa** > SIZE - **surface area 11,5 m<sup>2</sup>**

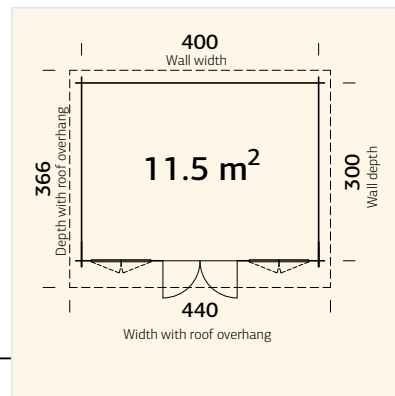

## Product information

Each page contains one or two of our products with all the information about it listed as symbols or as text. This example below will help you read and understand product information better.

## PALMAKO CABIN LISA 11,5 m<sup>2</sup>

ARTICLE NUMBER: 102281

**NEW!** — This is a new product  
**under 2,5m** — Height of product is under 2,5 meters

Groundplan

### Specifications for the specific model

#### MODEL SPECIFICATIONS

<b>Log measurements:</b> 420x320 cm	<b>Door opening measurements:</b> 114x186 cm

**AFTER**

# Palmako doors and windows

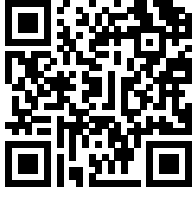

We have many doors and windows in our product range. When you read the model descriptions next to our products you will probably notice that by door and window type we use certain words like Garden, Garden+ or Summer. These words represent agreements of what is inherent to a particular door and window type. Of course there can be exceptions depending on a model, but overall after getting familiar with the following table on the next page you will have an overview of our doors and windows.

For example the door and window type of our classical cabin Helena 15,1 m<sup>2</sup> is Summer. Please see the drawings of the door and window with the features characteristic to Summer door and window type:

Scan this QR-code to see the door and window types table on our homepage! Likewise on the webpage the same table is shown on the next catalogue page.

Scan the QR-codes to see the videos of specific door and window types:

	Shed	Eco	Garden	Garden+	Summer	Living <sup>1</sup>
<b>Suitable for walls</b>	12-44 mm	16-44 mm	28-70 mm	40-70 mm	40-70 mm	88-134 mm
<b>Wood type</b>	Nordic Spruce	Nordic Spruce	Nordic Spruce	Nordic Spruce	Nordic Spruce or Pine	Nordic Pine
<b>Glazing</b>	Acrylglass	Single, 4 mm	Single, 4 mm	Double, 3-6-3 mm / toughened, 4-6-4 mm	Double, 3-9-3 mm / toughened, 4-9-4 mm	Double, 3-9-3 mm / toughened, 4-9-4 mm / double toughened, 4-18-4 mm

# WE PRODUCE COTTAGES OF YOUR DREAMS

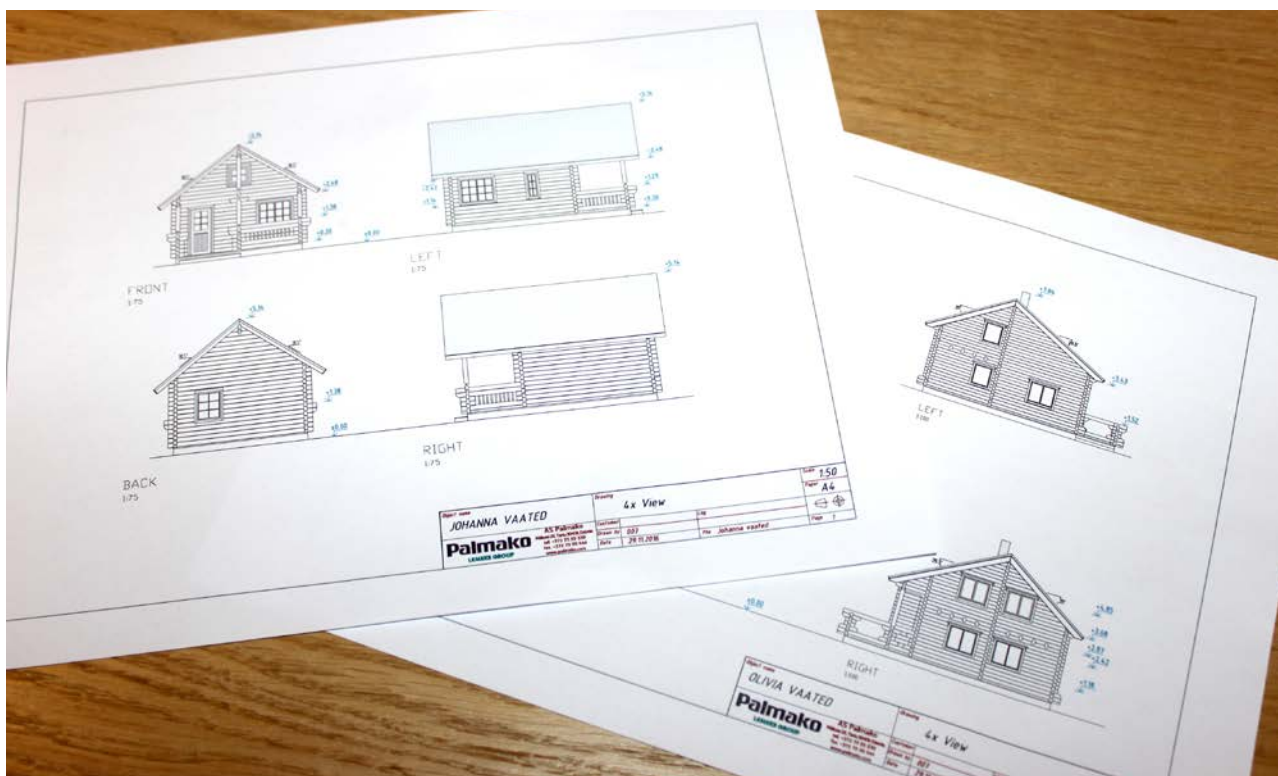

We offer houses with wall thicknesses of 44 mm and 70 mm solid timber, as well as 88 mm, 114 mm and 134 mm laminated timber.

This catalogue includes only some of the models and ideas available for weekend houses – with the help of our architects and bespoke design service we are also able to offer buildings made to your own specific design and requirements.

The 4-side views and ground plans will be supplied when necessary for acquiring a building permit. We can offer you the complete set of wooden details needed for the construction of the house like doors-windows, stairs, cladding for the walls etc. With every house we supply detailed specifications and blueprints for installing the house. All parts have been marked to simplify construction. Please ask for further details.

Individual modifications for all these cottage models in this catalogue are possible! We can also offer these houses with premium quality doors and windows (starting from 70 mm log thickness).

We hope you will take contact with us if you have a dream cottage vision in your head. Together we will definitely find the best solution bringing it to reality.

# MODERN LOOK

PALMAKO MODERN  
LOOK HOUSES

120-131

# GRACE FAMILY BY PALMAKO

**Palmako's new Modern Look Grace family houses are born from constant unrest to create something new and exciting.**

**These cabins are extraordinary due to the innovative solution for wall construction – special profile of glue laminated timber wall panels. Glue laminated timber is stable and durable base material, that is also wonderfully easy to set up.**

**The creation of such products is possible, since Palmako's investment into the new fully automatic production line of laminated timber.**

Glue laminated wood ensures, that the building does not sink after completing. Unlike conventional laminated timber houses, new wall panel profile is unique - it is thin and high and the tenon joints stay tighter by being covered with a slat.

To reach the full height of the house, only 4 panels on top of each other are needed. When the lifting height of an ordinary milling beam is 114 mm, the new wall panel has a lifting height of 518 mm, which means that the surface of the wall remains smoother. Laminated timber is stable (no expansion-contraction or distortion), has a beautiful structure (no fissures

or defects) and has a good fire resistance and heat insulation.

New innovative garden house family has seven modern cabins. The first four, Grace 8,1+4,1 m<sup>2</sup>, Grace 8,1+8,1 m<sup>2</sup>, Grace 12,4+4,1 m<sup>2</sup> and Grace 14,5 m<sup>2</sup>, differ only in size and purpose. Why not create a cozy home office in a small cabin with a shorter canopy roof or use the Grace with a longer canopy roof as a sauna or pool house. Grace 12.4+4.1 m<sup>2</sup> with two rooms is perfect for accommodate friends or relatives. The largest Grace can probably obtain the most functions.

The next three cabins, Grace 11,2 m<sup>2</sup> Slide Plus, Grace 11,2+8,2 m<sup>2</sup> Slide Plus and Grace 14,1 m<sup>2</sup> Slide Plus, take the Modern Look category to the next level. These house models have sliding doors with double toughened 4-16-4 mm glass. The large glass surfaces let more light into the house and allow a great view from inside out. The dark grey colour RAL7016 of the sliding doors frame suits well with any treatment. Please read more about the sliding doors on pages 340-341.

**All Modern Look garden houses use innovative glue laminated wall panels.** Lifting height of 518 mm makes an installation of the house easy and fast.

**Modern wall corner connection** of glue laminated wall panels is fixed with dowels and secured by screws.

**Stable and weatherproof** corner and log connections are guaranteed by using self-adhesive sealing.

**Premium quality windows and door**

The quality of Grace houses doors and windows is the best in its class. Laminated timber door frames, high quality classy oak-aluminium combined door sill, double toughened glass and premium lock system. Windows are with one-hand tilt-and-turn system with double toughened glass.

**Foundation joists and floor boards**

Foundation joists of the Grace houses are treated to guarantee long lifetime to the basis of the house. Solid 28 mm floor boards and floor slats are included in the house kit.

**Roof construction**

Strong glue laminated rafters carry 19 mm roof boards. To ensure water resistance of roof, we strongly recommend to use solid EPDM roof covering for these pent roof house models.

**Paint finishing options**

The doors/windows can be delivered from the factory with paint finishing, and the colour shade can be chosen from RAL colour chart. The most popular colour tones are:

**RAL 1001**

**RAL 3009**

**RAL 6006**

**RAL 7016**

**RAL 9005**

**RAL 9010**

NB! Colours as shown in the catalogue may vary from the actual colours.

# WE HAVE A GREAT ALTERNATIVE TO THE TRADITIONAL GARDEN HOUSE!

These contemporary-style buildings with a Scandinavian look and quality are most suitable for a city garden. Palmako Nordic Houses represent our most modern and innovative pre-fabricated house models.

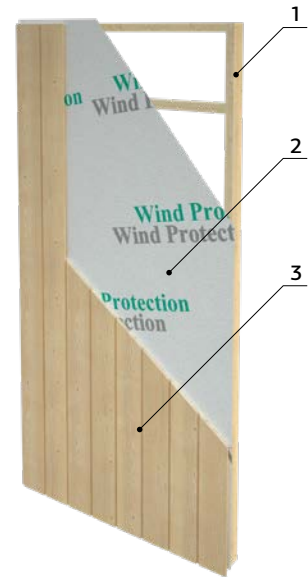

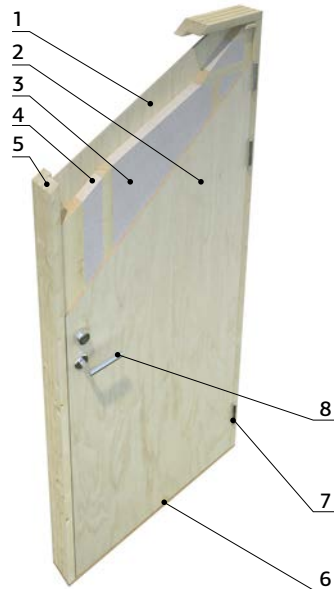

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind resistant. 70 mm frame construction is perfect for hiding cabling (wires, pipes, etc) as well as for the same thickness of insulation. All the houses have double thermo glazing and outwards-opening windows.

These models have 40 mm EPS (Expanded polystyrene) insulated doors, which makes them especially rain and wind resistant.

Total element thickness by Nordic houses is 88 mm. Here is a cross section of an element just to get better understanding of what these elements look like and consist of:

1. Plywood 10mm
2. Plywood 10mm
3. EPS 50 40mm insulation
4. Wooden skeleton 40x40mm
5. Wooden laminated frame 44x105mm
6. Hardwood 28x93mm threshold
7. Hinge 115x84x3mm (3x)
8. 565 lock and lock box

1. 34x70mm frame
2. Wind-protection plastic
3. 18mm fine sawn cladding

# PRE-FABRICATED PALMAKO NORDIC+ HOUSES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style houses are suitable for any garden that lacks strong, weather-resistant buildings where you can be with your family and friends. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ houses.

Ready-made wall elements are covered with wind-protection plastic inside, making these houses extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better house ventilation we have added ventilation battens under the cladding. All the houses have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness of Nordic+ houses is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

## One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

# GARDEN SPA

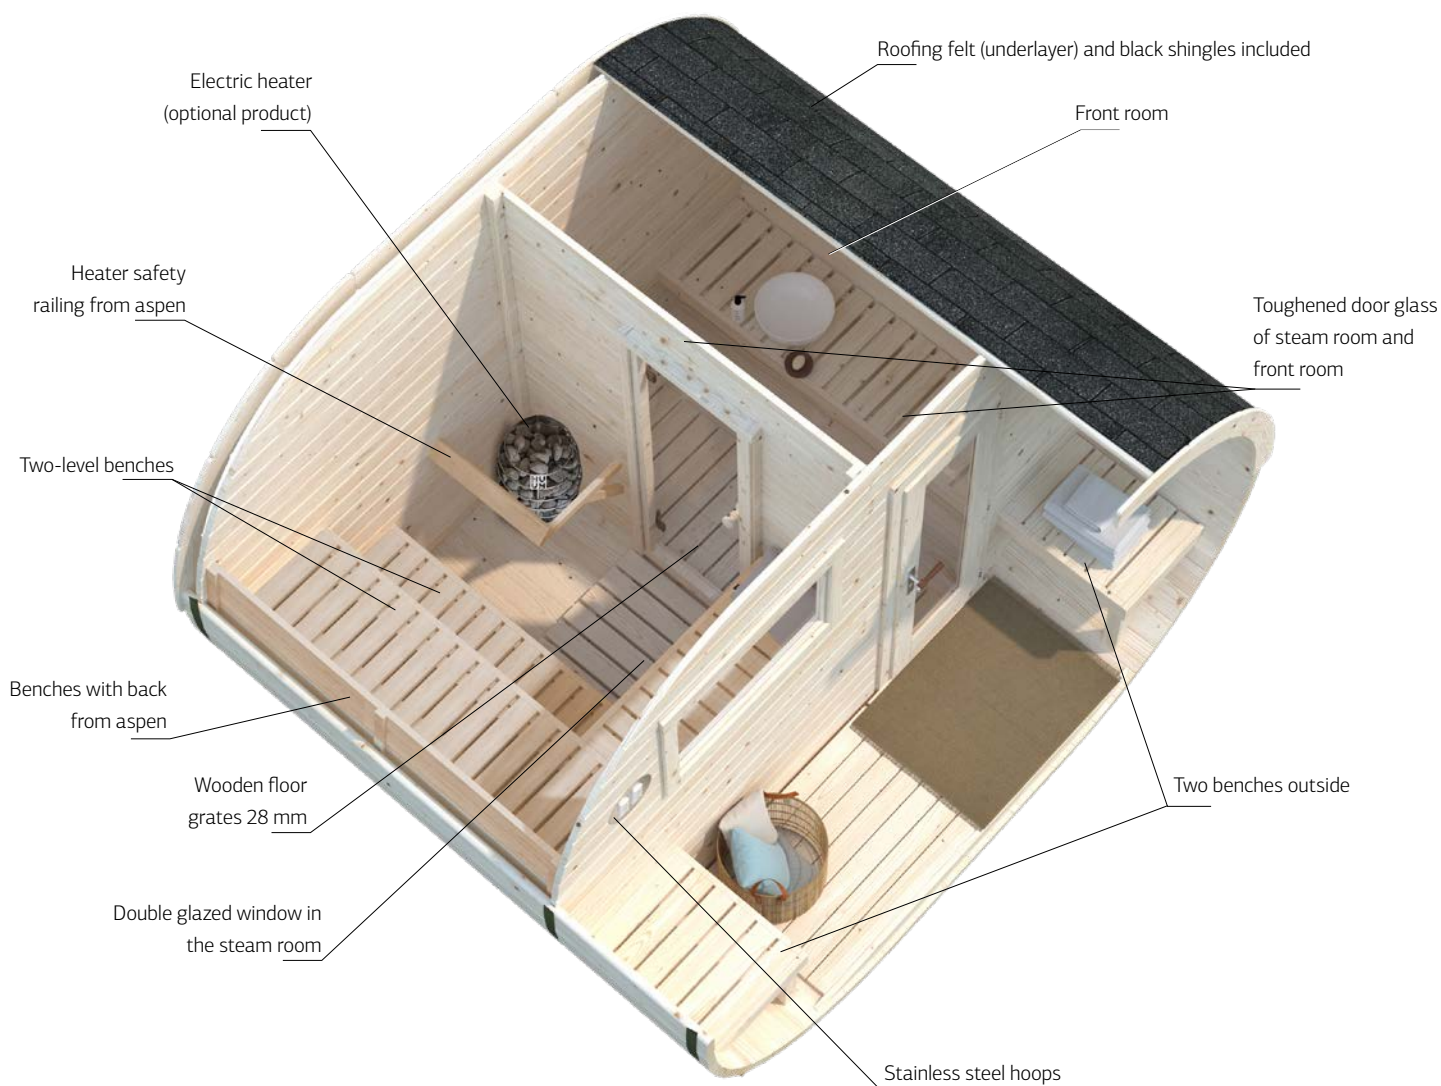

# OUTDOOR SPA IN YOUR OWN GARDEN

We are delighted to introduce you our brand new Garden Spa category - a generation of Spa products, which brings a new level of innovation to our range. What could be more enjoyable than having an outdoor spa in your own garden, a relaxing area and a healthy extra space for yourself, your family and friends. With having a sauna in the garden you can easily transform your garden or property into a personal functional garden SPA.

We have in Garden Spa product range many saunas – let us introduce you the barrel saunas called Anita and an oval sauna Anette 3,0+1,5 m<sup>2</sup>. There are five Anita barrel sauna models. The first, Anita 0,9 m<sup>2</sup>., is the smallest one, a very compact and little space requiring sauna. The larger Anitas are available with the wooden front wall and a glass front wall, accordingly Anita 1,3+0,7 m<sup>2</sup>., Anita 1,3+0,7 m<sup>2</sup>. with glass wall, Anita 1,6+0,7 m<sup>2</sup>. and Anita 1,6+0,7 m<sup>2</sup>. with glass wall.

Electric heater can be ordered as an optional extra, there are HUUM Drop and Narvi NM heaters in our selection, please see the pages 185-186 for more information.

Please get familiar with the 3D cross-section showing the main features of an oval sauna Anette 3,0+1,5 m<sup>2</sup>.

The shape of barrel and oval saunas provide a **good air circulation**, the heat distribution is very even because after hot air rises in the steam room it gently curls down each side of the sauna. Cool air is pulled in the low vent by the vacuum created by hot air rising, which then exhausts out the high vent on the opposite side of the room.

Steam room **benches with backside** take the pressure off from low back, shoulders and neck and help to ensure the spine in a neutral position. These benches are made of **aspen** which has low thermal conductivity and does not release resin.

The **two-level benches** (in Anita 0,9 m<sup>2</sup> and Anette 3,0+1,5 m<sup>2</sup>) allow each person to choose the optimal temperature regime.

Removable **28 mm wooden floor grates** can be easily cleaned, do not let to slip and feel really good under your bare feet.

**Front room** (in Anette 3,0+1,5 m<sup>2</sup>) can be used for many different purposes – you can either wash yourself or store the things there, change the clothes, take a short break or sometimes just hide from a bad weather.

**Black shingles** are included in the set. Shingles protect your sauna from the top and give the final touch in appearance. Anette 3,0+1,5 m<sup>2</sup> set includes additionally also the roofing felt (underlayer).

Both saunas have **high quality doors and window**. The glass door of the steam room has a 8 mm toughened glass, meanwhile the partly glazed outside door has a 4-6-4 mm double toughened glass. The window has a 3-6-3 mm double glass.

**Window in the steam room** (in Anette 3,0+1,5 m<sup>2</sup>) lets natural light inside the room and gives chance to look outside while taking bath procedures. Anita 1,3+0,7 m<sup>2</sup> glass wall and Anita 1,6+0,7 m<sup>2</sup> glass wall models have a glass front wall with 6 mm toughened glass, which lets you to enjoy the nice view to your garden.

**The cozy benches outside** offer a nice place where to take a short break, breathe the fresh air or enjoy some refreshments.

# PALMAKO LOG SAUNAS

Garden Spa product range includes different looking saunas, everyone should find a sauna they are looking for. In addition to the barrel and oval saunas one can relax and enjoy the sauna rituals also in our log saunas called Sanna.

Sanna steam room ceilings are provided with the 30 mm **insulation** and covered with the 16 mm wooden **cladding**.

Steam room benches are made of **aspen** which has low thermal conductivity and does not release resin. The **two-level benches** allow each person to choose the optimal temperature regime.

The **cozy sitting bench** outside offer a nice place where to cool down after the session in steam room and take a short break meanwhile the **Louvre panel** provides privacy.

Sanna saunas have **high quality doors and windows**. The glass door of the steam room has a 8 mm toughened glass, meanwhile the partly glazed outside door has a 4-9-4 mm double toughened glass. All windows have a 4-9-4 double toughened glass. All Sanna saunas have **window in the steam room and front room**, which lets natural light inside the room and lets enjoy the view from inside out.

The frame colour of Sanna 12,8 m<sup>2</sup> **sliding doors** is dark grey RAL7016. Sliding door Slide has 4 mm toughened glass, sliding door Slide Plus 4-16-4 mm double toughened glass.

# A HEATER IS THE HEART OF YOUR SAUNA

A heater is like the heart of a sauna, without the heater there will be undoubtedly no joy of being in a sauna. Although both wood-burning and electric heaters have their advantages and drawbacks, eventually, the choice of the heater is a matter of personal preference. Our saunas are developed for heating with electric heaters, which we offer as optional products. Electric heaters heat up the sauna fast, allow the users to have control over the temperature and change it easily. Please keep in mind to use a licensed electrician to complete the installation of an electric heater.

There are two heaters in our selection – HUUM Drop and Narvi NM, both 6 kW. Please get familiar with the descriptions and specifications so you can make the right decision for choosing the one for your sauna. For further information please ask from the salesteam.

## Narvi NM electrical heater 6 kW

Black painted, stainless steel

2-year warranty

Measures: 580 x 430 x 300 mm (height x width x depth)

Safety distance: sides 50 mm, front 80 mm, up 1150 mm, floor 120 mm

### The set includes

- electric sauna heater
- sauna stones (two boxes, 40 kg)
- installation brackets and connection wiring (different wires inside the heater)

The wire from heater to plug is not included in the set. The heater has the readiness for this cable – the holes in the heater where to put the wire ends from the plug.

### Power

Fuse	3 x 10 A
Supply voltage 3-phase	400 V 3N
Cable	5 x 1,5 (N x mm <sup>2</sup> )

In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be done before the circuit breaker.

All of the electrical connections must be done by a certified professional.

## HUUM Drop electrical heater 6 kW

Stainless steel

5-year warranty

Measures: 590 x 390 x 335 mm (height x width x depth)

Safety distance: sides and front 120 mm

### The set includes

- electric sauna heater
- sauna stones (four boxes, 60 kg)
- built-in electronic control (UKU Local controller)
- wall mount
- 5+5 m cable for temperature and door sensor
- 3 m cable for main module and user interface
- Screws for fastening the user interface and temperature sensor

### Power

Fuse	3 x 10 A
Supply voltage 3-phase	400 V 3N
Cable	5 x 1,5 (N x mm <sup>2</sup> )

In the case of a 230 1N connection, an analogous connection is made to the 3-phase. The heating circuits must be done before the circuit breaker.

All of the electrical connections must be done by a certified professional.

### UKU Local controller

Temperatures: 40-110°C

Supply voltage: 400 V 3N; 230 V 1N

Heating period: 3h, 8h, 12h

Connectable to lights/ventilation and steamer

Temperature sensor and overheating protection

Door sensor

Child safety lock

Timer

### The set includes

Control console (105 x 55 x 22 mm)

Control console cable (3 m; 4 x 0,34 mm<sup>2</sup>)

Main module (142 x 90 x 58 mm)

Temperature sensor

Door sensor

Temperature/door sensor cable (5 + 5m; 2 x 0,22 mm<sup>2</sup>)

# CONNECT

# PALMAKO CONNECT – SPACIOUS BIANCA AND LENNA PAVILIONS

Palmako Connect product series is a brand new concept of different looking spacious pavilion sets. All these sets are an outcome of combining different Palmako Connect components. If you have a specific vision in your head how the building should looklike, all Palmako Connect components can be combined with each other to create your dream. In case you do not know which building you wish for and want to see which sets there are in our range to choose from, please get an overview of our sets starting from pages 200 and 222.

Palmako Connect product sets are with a pyramid gable and a pent roof, we call them accordingly **Bianca** and **Lenna**. All the sets are available in both roof types.

Palmako Connect Bianca 24,9 m<sup>2</sup> Set 211 Slide

Palmako Connect Lenna 24,9 m<sup>2</sup> Set 411 Slide

## Complete your Bianca or Lenna set with our optional products

Bianca 16,6 m<sup>2</sup> Set 205 basic model

**BEFORE**

Bianca 16,6 m<sup>2</sup> Set 205 with optional products

**AFTER**

In addition to the natural, untreated wood Palmako Connect products can be ordered in different dip treatments:

natural, untreated wood

brown dip

grey dip

clear white dip

# The overview of Palmako Connect pages

Palmako Connect product series has got a lot of main products, components and product sets, for better understanding of this section let us introduce you the structure of these pages.

## Palmako Connect introduction

p. 190-191

A summary of our exciting new product concept which has so many opportunities and possibilities to enrich your garden and improve the quality of your life.

## Overview of main products and components

p. 192-195

Product info and visuals of Bianca and Lenna roofs with the internal area of 8,3 m<sup>2</sup>, 16,6 m<sup>2</sup> and 24,9 m<sup>2</sup>, and components that can be fit and combined with each other (Bianca and Lenna extra roof, full wall, Louvre wall, wall with hatch, half-wall corner, fence, apex, sliding doors, floors).

## Bianca Sets

p. 196-217

Gable roof pavilions, many different looking sets to choose from, starting from airy pergolas and finishing up with the functional large buildings with sliding doors.

## Lenna Sets

p. 218-239

Pent roof pavilions, a lot of designs created in the interest of your garden to find the building that suits best. Take a look at the smaller pavilions or surprise yourself with our bright and large cabins with elegant sliding doors.

## PRE-FABRICATED PALMAKO NORDIC+ GARAGES WITH ELEMENT THICKNESS OF 160 MM

These Scandinavian-style garages are suitable for any garden that lacks strong, weather-resistant buildings where to park your car. Feel free to take your time and delve into the following pages of our best choice of modern, pre-fabricated Nordic+ garages.

Ready-made wall elements are covered with wind-protection plastic inside, making these garages extremely weatherproof, especially rain and wind-resistant. It is comfortable to be in a building when it is warm - we have thought about it and given you an opportunity for 95 mm insulation. You can insulate walls, floors and ceilings. For better ventilation we have added ventilation battens after cladding. All the garages have double thermo glazing and outwards-opening windows. These models have 40 mm EPS (expanded polystyrene) insulated doors.

Total element thickness by Nordic+ garages is 160 mm. Here is a cross section of an element just to get a better understanding of what these elements look like and consist of:

1. 44x95mm frame
2. Wind-protection plastic
3. 19x45mm ventilation battens
4. 28x70mm cladding support battens
5. 18mm fine sawn cladding

### One set – many houses!

A model contains set of wall and window-door elements, which can be rearranged in several ways. This results in multiple appearance options for the house.

# THE DOOR QUALITY OF MARTIN, OLAF AND KALLE SHEDS

Contemporary-style buildings including Martin, Olaf and Kalle sheds have ready-made wall elements that are covered inside with wind and moisture protection plastic, making these houses extremely weatherproof. A model contains a set of wall and window-door elements which can be rearranged in several ways. Simple construction allows for fast and easy assembly.

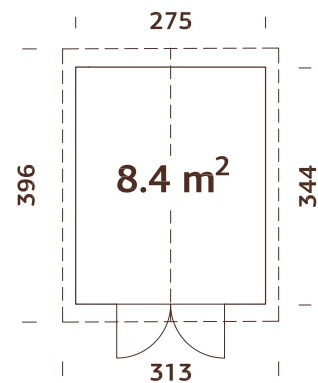

These models also have 32 mm EPS (expanded polystyrene) insulated doors, which make them especially rain and wind resistant. Please study the drawing.

1. HDF 3mm
2. EPS 50 32mm insulation
3. Wooden cladding 12x114mm
4. Wooden skeleton 32x40mm
5. Wooden laminated frame 44x90mm
6. Hardwood 28x78mm threshold
7. Metal kick plate 0,5mm covered with black pural matt coating
8. Hinge 115x84x3mm (3x)
9. 2018 lock and lock box

# CREATE YOUR OWN GARDEN STORY WITH PALMAKO FENCE PANELS

If your garden misses elegant and airy fence panels, be ready to meet our Fence panels selection. Surrounding your city garden or terrace with fence panels is so easy and refreshing way to give your favourite place to be a unique and modern look.

We have nine different designs within our fence panels collection so you can pick your favourite or why not to combine different designs according your needs. All our fence panels have 33x57 mm or 32x40 mm frame which makes them easily manageable and show your garden has been nicely taken care of. Please get familiar with designs as follows:

	<b>Line</b> Horizontal with gaps.		<b>Marit</b> Horizontal with gaps and two vertical rails. Vertical trellis with three crosses.
	<b>Nina</b> Horizontal with gaps.		<b>Karina</b> Vertical with rail in the middle. Vertical trellis with three crosses.
	<b>Reena</b> Vertical with rail in the middle. Horizontal trellis.		<b>Janet</b> Vertical boards with 6 mm bright toughened glass.
	<b>Elke</b> Vertical with rail in the middle. Vertical trellis.		<b>Birgit</b> 6 mm bright toughened glass in a solid wood frame.
	<b>Helis</b> Horizontal with gaps and two vertical rails. Vertical trellis with one cross.		

Depending on model, one can choose between ten dimensions:

And depending on model one can choose between different treatments which suits the best into the garden interior:

grey pressure-treated

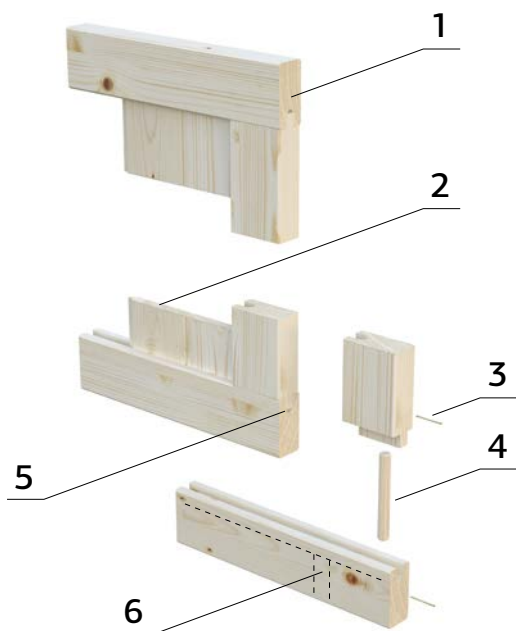

green pressure-treated

primer+white painted 2 layers (RAL 9016)

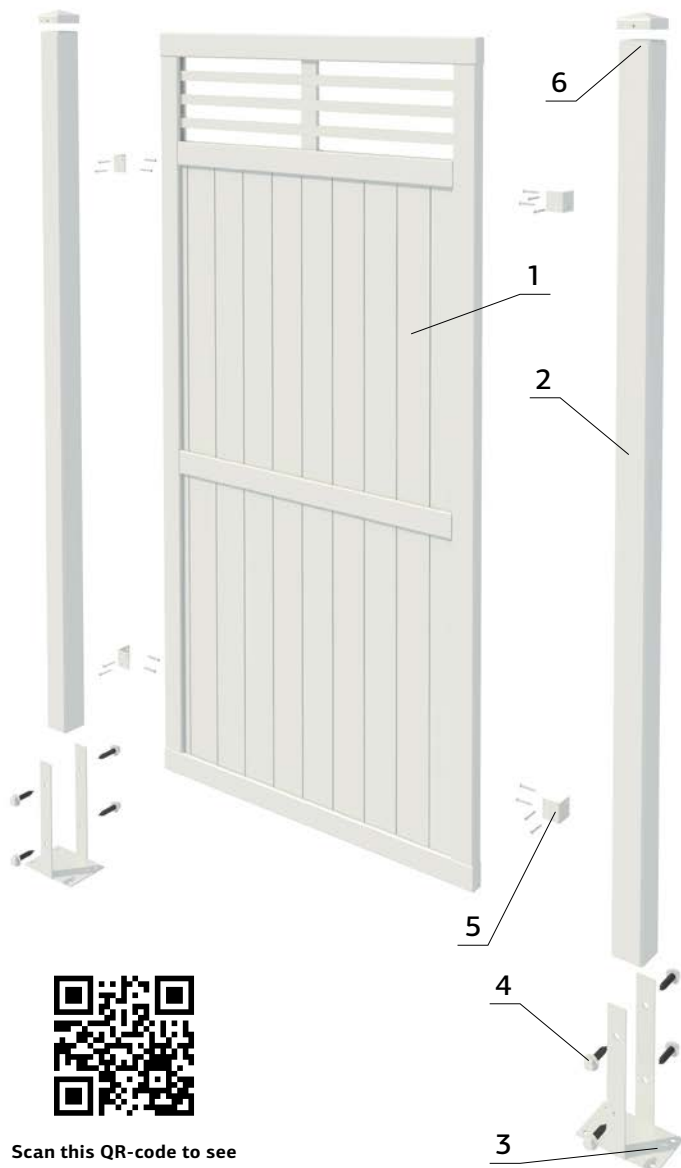

primer+grey painted 2 layers (RAL7016)

1. Frame profile 33x57 mm
2. Board profile 12x95 mm
3. Brad nails
4. Dowel 10x130 mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

**All our fence panels can be easily assembled. If you look at the visual of assembling a fence panel below, you will see which products you need and how to assemble them together.**

See Optional Products on p. 334 for details.

1. Fence panel
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Post cap

**Fixings to the ground should be done properly according to the foundation. Please get appropriate fixing items from the DIY-store.**

Scan this QR-code to see the assembly of Palmako Fence Panels!

**All fence panels are made of Nordic spruce which is dense, strong, durable and has small knots.**

## ASSEMBLING FENCE ELEMENT AND TERRACE FENCE

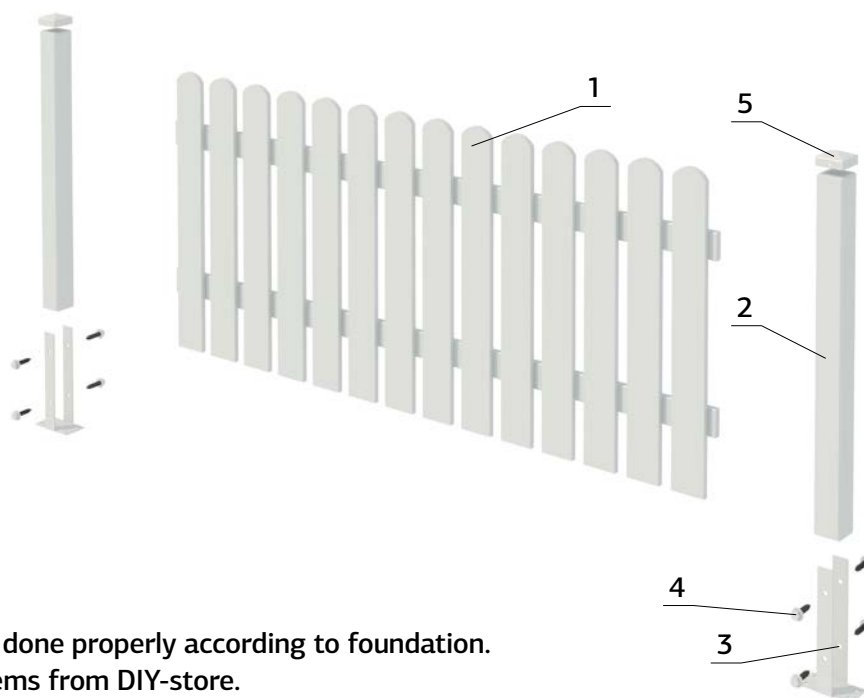

All our fence elements and terrace fences can be easily assembled. If you look at the visuals for the assembly of a fence element or terrace fence below, you will see which products you need and how to assemble them together.

See Optional Products on p. 334 for details.

### ASSEMBLING A FENCE ELEMENT

1. Element
2. Post
3. Post leg
4. Screws
5. Post cap

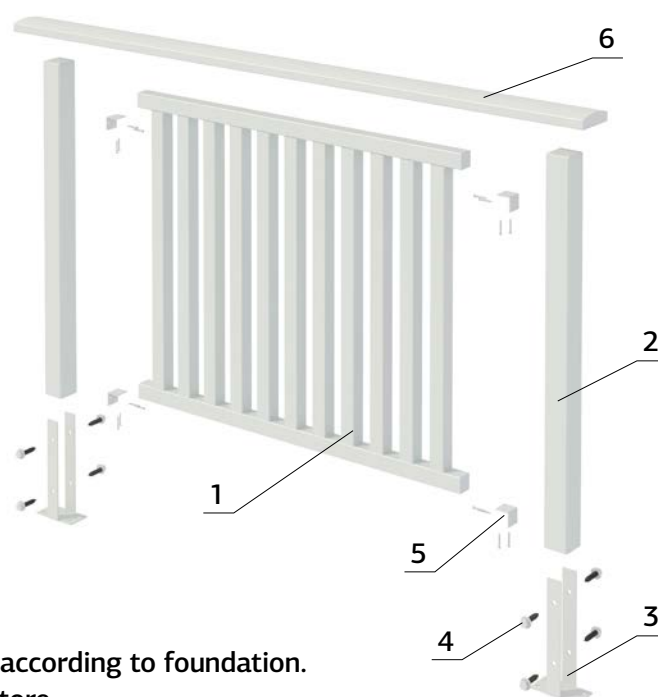

Fixings to the ground should be done properly according to foundation.  
Please get appropriate fixing items from DIY-store.

### ASSEMBLING A TERRACE FENCE

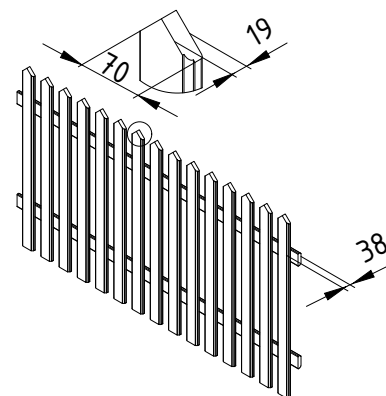

1. Terrace fence
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Handrail

Fixings to the ground should be done properly according to foundation.  
Please get appropriate fixing items from DIY-store.

# PALMAKO FENCE ELEMENT LOVISA 10

Engine set for garage sectional door includes electrical engine, metal installation construction (rails) and 2 remotes.

Depending on the model of the garage, additional accessories may be required for installation.

Electrical connection required!

# ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It can be welded on the preplaced bottom layer of roof cladding with a gas burner. Attention! For wooden houses please follow the safety requirements, and if possible please let it be welded by professional roofers. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

	Article number
Roofing felt, black, 1 roll = 10 m	107210
SBS roofing material black, 1 roll = 10 m	107214
Shingles, black, 1 pack = 3 m <sup>2</sup>	107180
Shingles, red, 1 pack = 3 m <sup>2</sup>	107182
Shingles, green, 1 pack = 3 m <sup>2</sup>	107183
Shingles, brown, 1 pack = 3 m <sup>2</sup>	107181
EPDM 3810x5100 mm	107166
EPDM 3810x7900 mm	107168
EPDM 4570x3200 mm	107169
EPDM 4570x3700 mm	107170
EPDM 4570x3900 mm	108624
EPDM 4570x5100 mm	107171

# ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

Palmako offers quite a wide range of flat roof cabins.

A question that we have always been asked is what to use as waterproof roof covering material for flat roofs? As you notice in the section of "Optional" under each flat roof house there is mention of special rubber roof covering material – EPDM (ethylene propylene diene monomer).

## Here are some of the benefits why we truly recommend you to invest in EPDM roof covering material:

- reduces potential condensations problems that can erode performance
- long average service life (can last up to 20 years)
- EPDM is the most dimensionally stable heat resistance membrane and stays flexible even in extremely cold conditions.

## EPDM users in colder climate can also benefit from:

- reduced heating costs
- reduced carbon footprint by lowering heating costs
- reduced safety hazard from snow and ice accumulation

We offer EPDM in ready-cut-pieces, the article number of suitable EPDM is given in the table of optional products after every product group and in Optional Products part at the end of the catalogue.

Our EPDM set includes wet-adhesive for installation.

The installation of EPDM is easy, just follow the installation manual enclosed with the product.

# FLOORS

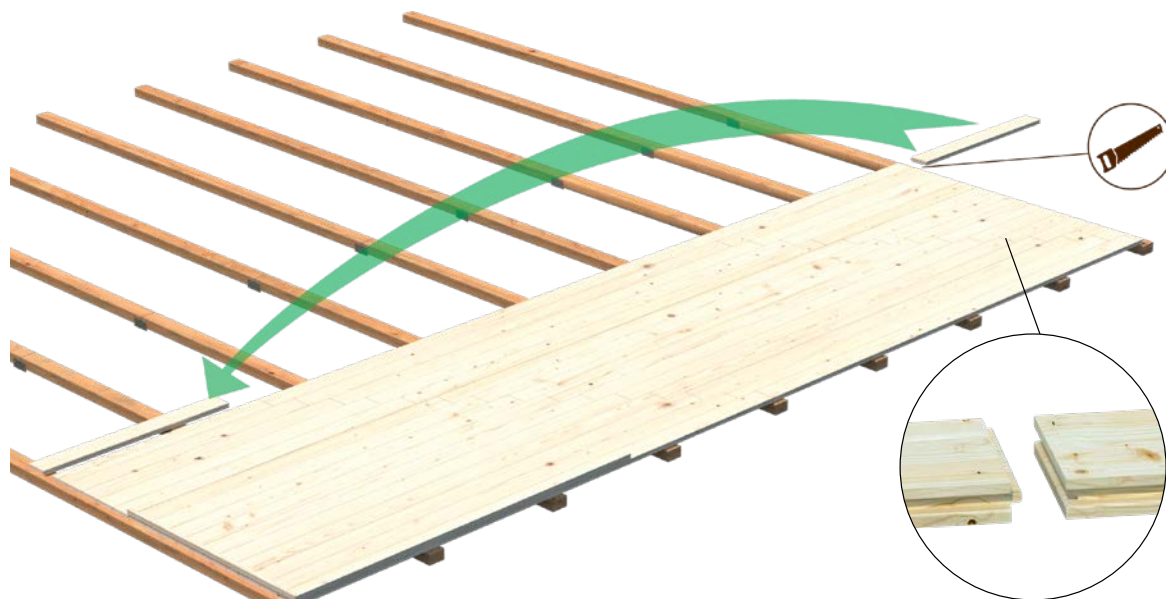

To meet the specific market demands some of our cabins are sold without a floor. Although in majority cases floor can be purchased as an optional extra. As of 2021 Palmako starts to offer unified floor kits in such a cases.

An unified floor kit contains of:

- 19x89x2350 mm double and tenoned needed number of floorboards
- 45x70x3000 mm brown dipped (BNDIP) needed number of foundation beams
- 19x19x2350 mm skirting boards
- 19x19 mm door strip according to the width of the door opening (in two sizes - for a single door and a double door) and the wall thickness.

Unified floor kits can be brown, grey or white dipped.

Due to the different size of cabins and measurements of the floors, please consider below described principle in general in cutting floorboards into the exact measure.

Double end tenoned floor board

70x70 mm white**  
Art. No.: 108300

**Post cap  
90x90 mm white**  
Art. No.: 108302

# ADDITIONAL DOORS AND WINDOWS

Majority of our cabins and buildings are designed in a way, that one can easily amend it with additional door(s) and window(s) in addition to the existing ones. So far Palmako offered limited range of additional doors and windows. As of 2021 we offer full range of doors and windows suitable to our buildings. For example our cozy and classical cabin Sally 15,5 m<sup>2</sup> has just one double window in original set. If one wishes a more lightful cabin, it can be easily amended by exactly same type of additional window (Art. No. 103502). As one building can consist of different size and model of doors and windows, please consult with our sales team before placing an order.

- 1 Cabin Sally 15,5 m<sup>2</sup> with one double window in original set
- 2 Cutting the wall according to the measures of the window
- 3 Cabin Sally 15,5 m<sup>2</sup> has now two double windows

# GLAZED SLIDING DOORS

From now on we have many houses with sliding doors in our product range. Sliding doors have many benefits which may encourage you to favor them over the regular doors. They let in more natural light, large glass panels running from the ground up to the top maximizes the natural lighting in the room. Sliding doors are useful if there is a need for ventilating the room without opening any door too wide. They are easy to operate by accessing in and out of the house. The large glass surfaces of the sliding doors let you enjoy beautiful views to the garden or backyard. And last, but not least, sliding doors look good, they add aesthetic to the building and are valued for functional and practical design. Sliding doors are just beautiful!

## Sliding door Slide

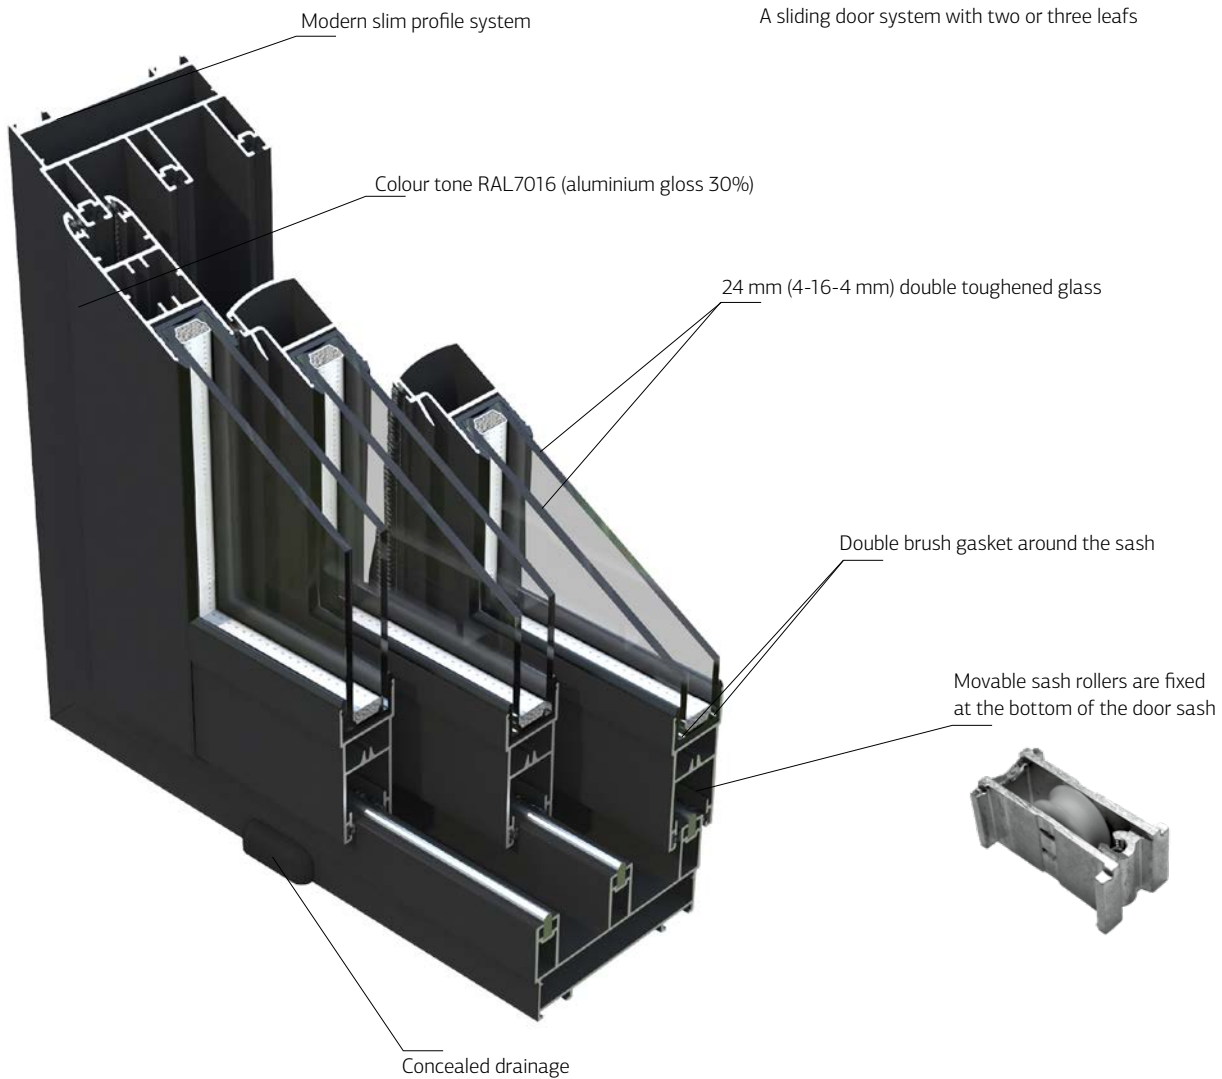

- Without thermal insulation
- Door leaf security plugs

Recessed pull handle with cylinder lock

# Sliding door Slide Plus

A sliding door system with two or three leafs

- Door leaf security plugs

Surface mounted pull handle with cylinder lock

# Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden - fence panels, terrace fences, garden furniture, machine rounded posts, flowerboxes, log rolls and many other products.

Unprocessed wood becomes greyish after having been left untouched for a while and can turn blue and become moldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore we recommend using our product treatment service. Depending on the product type we are able to treat the products in different ways.

## DIPPING

As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Sarpap & Cecil Industries water-soluble treatment liquid, guaranteeing treatment within classes 1–3. Dipped wood must be finished with at least two layers of topcoat. Topcoat should be applied on the dipped product as soon as possible. In case the dipped cabin is

left unfinished for over six months, the wood protective properties of the dipping liquid will start decreasing.

**BNDIP** brown dip

**GYPDIP** grey dip

**Dipping bath for treatment**

**WTDIP** white dip

Pressure-treated wooden details in a wood treatment autoclave

## PRESSURE-TREATING

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. Depending on model fence panels can be grey or green pressure-treated or white or grey painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS

wood preservative. This is a water-borne, chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

**GYVPI** grey pressure-treated

**GNVPI** green pressure-treated

**BNVPI** brown pressure-treated

**BNVPI** brown pressure-treated

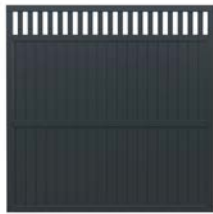

Painted products in drying chamber

## PAINTING

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white or dark grey, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.

**WTPNT1+2** primer + white painted 2 layers (RAL 9016)

**GYPNT1+2** primer + grey painted 2 layers (RAL 7016)

**WTPNT1+2** primer + white painted 2 layers (RAL 9016)

**WTPNT1+2** primer + white painted 2 layers (RAL 9016)

## PRIMING

Using the same technique, we are now also able to coat several houses with one layer of white primer (WTPNT1+0), which simplifies the further finishing of the product.

**WTPNT1+0** white primer

**WTPNT1+0** white primer

**WTPNT1+0** white primer

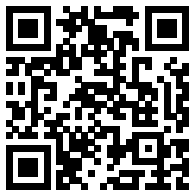

**WTPNT1+0** white primer

You will find available treatment options next to each product under Treatment Options section. Please get familiar with the article number and description of the treatment we offer as follows:

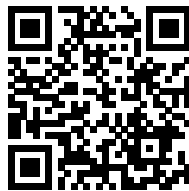

Art. No.	Description	Treatment
NO	Natural, untreated wood	
BNDIP	Brown dip	
GYDIP	Grey dip	
WTDIP	Clear white dip	
GNVPI	Green pressure-treated	
GYVPI	Grey pressure-treated	
BNVPI	Brown pressure-treated	
GNVPIH4	Green pressure-treated HC4	
GNVPIA	Green pressure-treated NTR-A	
WTPNT1+0	White primer	
WTPNT1+2	Primer + white painted 2 layers (RAL 9016)	
GYPNT1+2	Primer + grey painted 2 layers (RAL 7016)

LEMEKS GROUP

## Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children's playhouses, weekend and living houses. We also offer a wide choice of timber products in your garden – fence panels, posts and poles, wooden furniture and log rolls.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we use the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC certified and products made from FSC timber have been marked accordingly.

26 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
